

## CFD COMMODITY ADVISORY SERVICE

In recent years Contracts For Difference (CFDs) have become ever more central to mainstream investment policies. During this time we have developed an expert and experienced team to provide our clients with professional advice and support to their CFD trading decisions.

Our Advisory service combines technical analysis with an understanding of your personal trading objectives to help you fully exploit the advantages CFDs have to offer for short-term trading. You can call a member of our team on **020 7613 8338**, who will help you develop a CFD investment strategy to suit your risk preference and investment aspirations.

Our CFD Commodity advisory service includes:

- Regular analysis of the major commodity markets**
- Regular trading recommendations on Metal, Energy, Agricultural, Soft Commodities and Mining Shares, Indices and Forex markets**
- Independent advice on specific innovative trading strategies**
- Independent advice towards developing your own CFD trading strategy**

The service is available to PretiumCommoditiesclients who are looking todevelopan extensive CFD portfolio. We provide tailored accounts ranging from entry level to platinum status according to portfolio size.

### **Making the most from your CFD trading**

In a climate of growing financial market volatility and uncertainty CFDs are an increasingly popular trading vehicle, allowing clients to profit from short-term fluctuations without tying up capital. With Pretium Commodities you can execute CFD trading strategies for individual commodities, mining stocks or sector indices, currencies or leading commodity funds. We also have an extensive range of CFD options. Our unrivalled choice of markets allows you to develop and adapt an entire CFD portfolio with minimal effort. You can use CFDs in a number of way to support a variety of investment goals.

#### **Lowering portfolio risk**

As a supplement to an existing portfolio, CFDs can work to lower your overall level of risk. By hedging your existing investments with CFD trades you can reduce or eliminate exposure without the need to realise taxable gains from an existing holding.

#### **Sector-wide investment**

With Pretium Commoditiesyou can use CFDs to trade on market movements across entire sectors, as either a hedging strategy or a short-term trading exercise. You can gain or reduce your exposure to a particular sector without necessarily selecting individual commodities or fundson which to trade.

#### **Short-term gains**

CFDs provide a cost-effective means of short-term trading with minimal effort and outlay. As there are no constraints of settlement period or expiry you can create your own trading timeframe, and all your transactions are executed immediately.

## Our advisory team

You will be drawing on a rich pool of experience. Our team comprises a combined experience of several decades professional engagement in the financial markets and in particular the commodity sectors. This includes a range of expertise from portfolio management to futures and options broking. This gives us a thorough understanding of the practical application of technical market analysis across many fields.

Our technical analysis concentrates on target levels of support and resistance for both entry and exit levels. Employing leading indicators of pattern, price and time to project changes in trend and market direction.

We send frequent reports and trading recommendations by email to all subscribers, supported by extensive technical / fundamental research. In each case we state the appropriate entry levels and associated target and stop-loss levels. All our advice is given with relevance to recent and forthcoming events affecting global markets.

We will also provide personal advice as and when required, tailored to your unique trading aims. By taking the time to understand your risk profile and specific goals, we can help you to derive and execute an investment strategy with which you are fully confident. Our advice can range from an analysis of individual commodities to an assessment of your whole Portfolio and risk reward profile.

All in all, it's a superior service, giving you individual attention plus direct access to our expert resources. The perfect support to your CFD trading.

CFDs are a leveraged product and can result in losses that exceed your initial deposit. Trading CFDs may not be suitable for everyone, so please ensure that you fully understand the risks involved.
